

## Village of Salisbury Works Department

56 Douglas Street  
Salisbury, NB E4J 3E3  
Phone (506) 372-3243

### **SANITARY SEWER FLUSHING NOTICE**

The Village of Salisbury Works Department will be conducting a Sanitary Sewer Inspection/Maintenance program in the western section of the Village:

***August 10th, 2020 to August 14th, 2020***

The areas being maintained include: **Main Street** along the **north** side from **Civic 3235** to **Civic 3313**, **Main Street** along the **south** side from **Civic 3224** to **Civic 3306**; **Reeder Road** from **Civic 17** to **Civic 31** and from **Civic 22** to **Civic 46**; **Highland Drive** from **Civic 3** to **Civic 23** and from **Civic 4** to **Civic 18**. (location plan on reverse)

The work being carried out is part of regular and preventative maintenance routines which are necessary to provide an efficient and trouble-free system.

Sanitary Sewer Flushing will take place between the hours of ***8:00am and 5:00pm***

The cleaning involves high pressure water which may cause the air within the sewer mains and service laterals to pressurize. This increase in air pressure can displace the water column in your toilet and sink traps causing "spray-ups". If you experience a spray-up and detect any odors, you can quickly remedy the situation by adding a small amount of water to the affected traps.

The Village of Salisbury appreciates your patience as we work to improve the quality of services provided to residents and businesses.

If you have any questions, please contact the Works Department at (506) 372-3243, or the Village Office at (506) 372-3230.
