SALISBURY 250

AIRPLANE BUILT IN SALISBURY

The first and only airplane built in Salisbury was built on Veterans Ave in the basement of Mr. Art Robinson.
He began his project in 1969 and it was ready for take off in 1972.
The basement which it was built in did not have an exit door. Several men gathered to help break open a section on the wall to remove the plane from the house, which can be seen in the pictures below.

The plane was a single seater, yellow CF-BJT with a Volkswagen engine. Art created the propeller from wood himself.
The plane was never flown by its creator, but his son Arthur Jr., made the first flight from the Havelock flight club. Ron Colpitts purchased the plane, before selling it to a pilot in Ontario
